APPLICATION WORKSHOPS

PWTF 2003 Construction

Call today to request your application
(360) 725-5000

The Public Works Trust Fund (PWTF) provides low-interest loans and technical assistance to local governments that have critical public works needs. The PWTF is entering its eighteenth year, and has been able to assist local governments in financing over 876 infrastructure projects totaling \$1.3 billion in PWTF funding.

The PWTF continues to be an extremely competitive program, so if you manage a local government or are responsible for the infrastructure in your community, then you'll want to sign up for the workshops and learn the in's and out's of completing a competitive application. Hear how other communities have solved similar problems. Meet with your Regional Account Executive and learn how they can help.

Borrow up to \$10 million dollars with as little as 0.5% interest. The PWTF can meet your community where you are. Whether you are planning a project, or are ready to start construction, the PWTF has a loan program to fit that need.

DWSRF 2002 Application

Does your system need drinking water infrastructure improvements?

Do you need low-interest funding?

If you answered yes, the DWSRF loan program may be the solution you've been looking for.

The program is now gearing up for the 2002 loan cycle. Over \$25 million is available to fund drinking water capital construction projects. The goal is to increase public health protection and drinking water system compliance.

Washington is a national leader in getting these funds out to public water systems. Over \$106 million dollars have been committed to drinking water infrastructure improvements in Washington since the DWSRF program was introduced in 1997.

Applications for both
PWTF & DWSRF
are due
May 13, 2002

How to Develop Financial Capacity for Infrastructure Projects

This session covers the impacts of capital financing on user charges. It examines full cost pricing of services and capital improvements and provides a Financing Assessment Tool. This tool is a free Excel worksheet, which is designed to help communities determine the impact of future capital improvements and the effect of full-cost pricing on their budget. The Financial Assessment Tool may also be used to demonstrate financial capacity when developing a small water system management plan.

INVESTING IN WASHINGTON'S COMMUNITIES
